CAREER OBJECTIVE

An enthusiastic Computer Science undergraduate specialising in AI & ML with a strong foundation in Java, Python. Eager to apply technical knowledge and problem-solving skills to build scalable software solutions while continuously learning and contributing to organizational success.

EDUCATIONAL QUALIFICATION

Degree/Examination	Year of Passing	Name of Institute	CGPA / Percentage
Bachelor of Technology – Computer Science & Engineering (AI & ML)	2027	Heritage Institute of Technology, Kolkata	7.59
Class 12 – CISCE	2023	Purwanchal Vidyamandir	78
Class 10 – CISCE	2021	Purwanchal Vidyamandir	89.33

PROJECTS

Battery Remaining Useful Life (RUL) Prediction | [GitHub](#)

Academic Research Project under Prof. Rashmi Bhardwaj, Guru Gobind Singh Indraprastha University

Technologies: Python • Pandas • NumPy • Scikit-learn • Matplotlib

- Built a machine learning pipeline to predict battery Remaining Useful Life (RUL) using cycle-level battery sensor data.
- Engineered degradation-based features including State of Health (SOH), capacity fade rate, and voltage drop to improve prediction accuracy.
- Evaluated Linear Regression, Ridge Regression, Random Forest, and Gradient Boosting models using Leave-One-Battery-Out (LOBO) cross-validation.

Intelligent EaaS Platform for Personalized Uplift Modeling | [GitHub](#)

Technologies: Python • Machine Learning • Scikit-Learn

- Developed an Experimentation-as-a-Service (EaaS) platform using uplift modeling for data-driven decision making.
- Implemented S-Learner, T-Learner, X-Learner, and R-Learner models to estimate treatment effects and optimize targeting strategies.
- Built automated user segmentation and analytics workflows to support scalable experimentation and personalized recommendations.

EcoByte – Smart E-Waste Management Platform | [Live Demo](#)

Technologies: Python • JavaScript • HTML • CSS

- Developed a full-stack e-waste management platform with role-based workflows for users, vendors, and administrators to track and manage e-waste disposal.
- Integrated a Random Forest-based pricing engine to estimate the resale value of e-waste items using historical product data.
- Implemented QR-code based tracking and analytics dashboards for end-to-end monitoring, reporting, and inventory management.

TECHNICAL SKILL SETS

- **Programming Languages:** Java, Python
- **Databases:** MySQL
- **Domains:** Machine Learning, Deep Learning
- **Other Tools & Technologies:** Git, GitHub

ACHIEVEMENTS

- **Runner-Up & Team Lead – HackHeritage 3.0**, Heritage Institute of Technology, Kolkata. Successfully led a team to secure **2nd Place**, demonstrating leadership, collaboration, and technical problem-solving.
- **Perfect Score – Computer Science, CISCE Class XII Board Examination.** Achieved **100/100** in Computer Science.
